

**SAVEWATER**

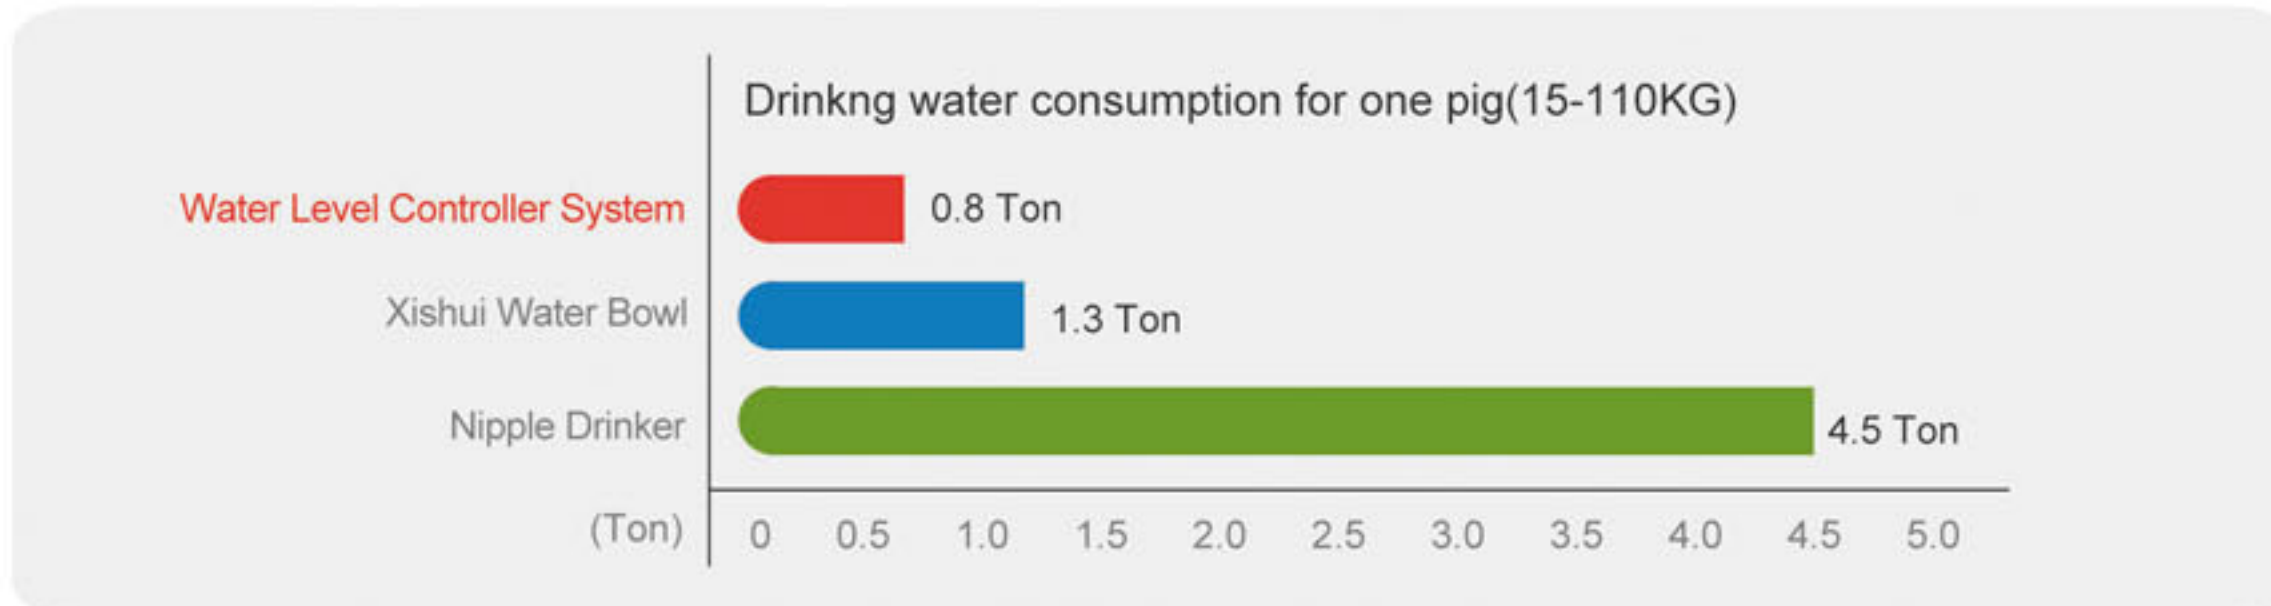

**?** Are you still suffering from:  
Vast drinking water waste & sewage output?  
Huge capital & energy investment?

**Now choose Xishui,**  
Our drinking solution will help you save much cost and gain more profit!

Do you know how much drinking water is consumed by using different kinds of drinkers?

### Farm Challenges:

- 01** Leakage of water from pig mouth.
- 02** Water waste when pig playing water.
- 03** Leakage of water from nipple drinker because of aging spring or O ring.

By using "Savewater" water level controller, above waste can be perfectly solved.

- / Eliminate water waste when pigs drink water
- / Ensure adequate drinking water, improve pig water intaking.
- / Ensure clean and fresh water.

- / Eliminate water waste caused by pigs playing water;
- / Provide most natural drinking way for pigs, improving animal welfare.
- / Decrease fodder wasting, enhance the feed conversion ratio.

- / Get rid of leakage of nipple drinker caused by aging spring or O ring.
- / Decrease wasting of drug and nutrition added in drinking water.
- / Reduce pigs' drinking stress reaction because of group transfer.

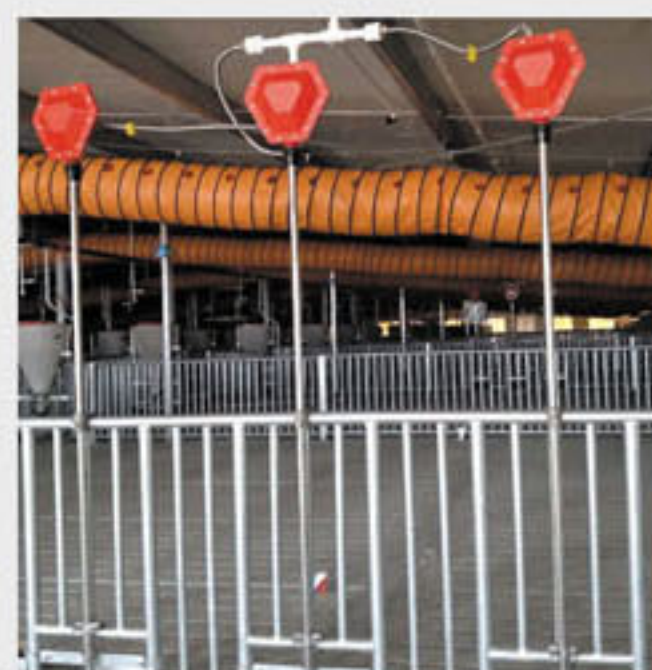

## Water Level Controller System

Item No.: 100010801  
Pressure: 1-7Bar  
Lifespan: 5 years  
Flow rate: 2.5L/min

- Unique occlusal design with 304 SS anti-off nuts, eliminate water and air leak.
- High performance membrane guarantees work over 300,000 times.
- Scientific design of large water flow inlet ensures constant and sufficient water supply, even under lower water pressure.
- External valve to reduce membrane damage.

## Suggested professional combination

100010710  
One-Side Drinking Water Plate

1000107200  
Nursery Drinking Water Plate

100010730  
Fattening Drinking Water Plate

*Flexible for all pig farm  
units and facility renewal.*
